### ***Compatibility Between JANUS and the Programmer's Software Kit***

To use the Programmer's Software Kit (PSK), you must use the version of PSK that matches the JANUS software in your reader. To find the version of your JANUS software, start the configuration application and choose About from the File menu.

If you choose to upgrade your JANUS software, you must recompile your application using the matching version of PSK. This is *not* the case for versions of JANUS software beyond 1.30.

Applications using PSK 5700A will run on newer JANUS software versions *without* recompiling.

For JANUS version number	Order PSK	To upgrade J2010 software to this version, order	To upgrade J/JR2020 software to this version, order
1.20	060630	058789S-001	—
1.21	060631	058789S-002	—
1.22	059812	058789S-003	060012S-001
1.23	060803	060703S-001	060712S-001
1.24	061173	060703S-002	—
1.24a	061416	060703S-003	060712S-002
1.30	5700A	060703S-004	060712S-003
Beyond 1.30	5700A	For future upgrades, contact an Intermec sales representative.
