## INTRODUCTION

---

Metrologic's IS8000 series scanners bring the benefits of holography to long-range industrial bar code scanning. Enclosed in rugged NEMA-12 cases for industrial environments, the IS8000 series provides omnidirectional scanning with optional no code/wrong code warning. They can be mounted in any orientation and are capable of primary/secondary setup for added versatility.

There are several IS8000 models to choose from depending on the scanning application.

- The **IS8300** produces 5,250 scan lines per second with a depth of field of 457.2 mm (18")\*\* and a width covering 304.8 mm (12")\*\*
- The **IS8400** produces 3,360 scan lines per second with a depth of field of 711.2 mm (28")\* and a width covering 558.8 (22")\*
- The **IS8500** produces 5,600 scan lines per second with a depth of field of 711.2 mm (28")\* and a width covering 558.8 (22")\*
- The **IS8800** produces 5,600 scan lines per second with a depth of field of 812.8 mm (32")\* and a width covering 457.2 (18")\*

\* The area defined is based conservatively on a 0.33 mm/0.013" bar code width. Actual scan areas will vary by label size and application.

\*\* The area defined is based conservatively on a 0.25 mm/0.010" bar code width. Actual scan areas will vary by label size and application.

Several optional features are also available for the IS8000 series including a hand-held scanner port, Triac output, a high volume external speaker box and object sensor input with the use of a MX001 industrial control interface. All scanners can be programmed using Metrologic's MetroSet® configuration program available on CD or downloadable from Metrologic's web site at [www.metrologic.com](http://www.metrologic.com).

## Applications and Protocols

The following chart specifies the version identifier for the communication protocol.

| Scanner          | Version Identifier | Communication Protocol(s)  |
|------------------|--------------------|--|
| IS8300 or IS8800 | 1                  | RS-232/RS-422/Light Pen Emulation  |
|                  | 1L                 | RS-232/RS-422/Light Pen Emulation Low Speed Option                       |
| IS8400 or IS8500 | 1                  | RS-232/RS-422/Light Pen Emulation  |
|                  | 1E                 | RS-232/RS-422/Light Pen Emulation with External Speaker                  |
|                  | 1L                 | RS-232/RS-422/Light Pen Emulation Low Speed Option                       |
|                  | 1LE                | RS-232/RS-422/Light Pen Emulation Low Speed Option with External Speaker |

## SCANNER AND ACCESSORIES

---

The following is a list of parts included in a standard IS8000 kit:

- IS8000 Series HoloTrak® Holographic Scanner
- Power Supply
  - [MLPN 46-46207-US] 12VDC @ 4.16 Amps, 220VAC or
  - [MLPN 46-46207-UK] 12VDC @ 4.16 Amps, 240VAC or
  - [MLPN 46-46207-EC] 12VDC @ 4.16 Amps, 120VAC
- Communication Cable
  - [MLPN 52-52702] Standard 2 meter (6 ft.) cable
- Mounting Bracket
  - [MLPN 45-45615] for IS8300 or
  - [MLPN 45-45616] for IS8400/IS8500/IS8800
- Installation and User's Guide [MLPN 00-02377]
- MetroSet® Scanner Configuration Software for Windows

### Optional Accessories available:

- [MLPN MX008] MX008 External Speaker (for use with IS8400 & IS8500 only)
  - MX008 High Volume Speaker
  - [MLPN 52-52206] 3.7 meter (12 ft.) Communication Cable
- [MLPN 45-45745] MX001 for Single Scanner Setup
  - MX001 Industrial Controller
  - [MLPN 52-52708] Communication Cable
- [MLPN 45-45718] MX001 for Primary/Secondary Scanner Setup
  - [MLPN 45-45745] MX001 for Single Scanner Setup
  - [MLPN 52-52709] Communication "Y" Cable
- Cables
  - [MLPN 52-52704] 6 meter (20 ft.) IS8000 Series Communication Cable
  - [MLPN 52-52707] 3 meter (10 ft.) IS8000 Secondary Cable (not for use with MX001)
  - [MLPN 51-51882] 0.25 meter (10 inch) Tech Secondary Adapter Cable
- Replacement Parts
  - [MLPN 45-45224] Scan Window for IS8300
  - [MLPN 45-45223] Scan Window for IS8400/IS8500/IS8800

If any item is missing or to order additional items, contact the dealer, distributor or call Metrologic's Customer Service Department at 1-800-ID-METRO or 1-800-436-3876.

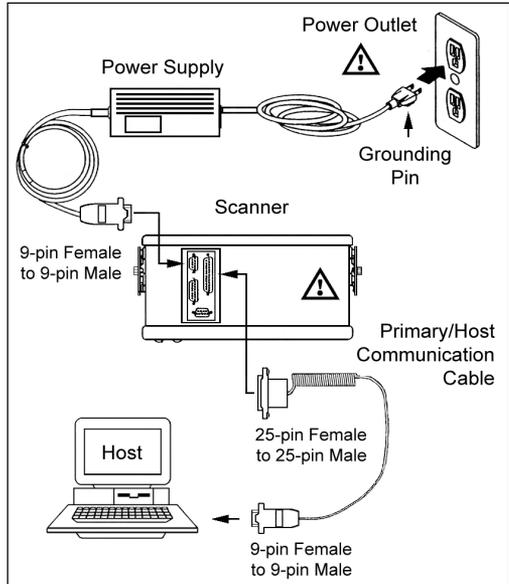

# INSTALLING THE SCANNER TO THE HOST (STANDARD FEATURES)

## Single HoloTrak® Installation

To avoid potential problems, do not power up the scanner until the communication cable is secured to the host.

1. Turn off the host system.
2. Connect the communications cable to the HoloTrak® and to the host.
3. Check the AC input requirements of the power supply to make sure the voltage matches the AC outlet.
4. Plug the power supply to the scanner.
5. Plug the power supply into the AC outlet to supply power to the scanner.
6. Power up the host system.

## HoloTrak Primary/Secondary Feature

The primary/secondary feature gives the ability to connect or "daisy-chain" two scanners together to act as one scanner interfacing with only one host.

### PRIMARY/SECONDARY COVERAGE WITH ONE HOST AND TWO HOLOTRAKS

|               | Single Conveyor               | Two Conveyors                      |
|---------------|-------------------------------|------------------------------------|
| <b>IS8300</b> | 12" (305 mm) to 24" (610 mm)  | 12" (305 mm) coverage per conveyor |
| <b>IS8400</b> | 22" (559 mm) to 44" (1118 mm) | 22" (559 mm) coverage per conveyor |
| <b>IS8500</b> | 22" (559 mm) to 44" (1118 mm) | 22" (559 mm) coverage per conveyor |
| <b>IS8800</b> | 18" (457 mm) to 36" (914 mm)  | 18" (457 mm) coverage per conveyor |

*Continued on next page*

### Caution:

To maintain compliance with applicable standards, all circuits connected to the scanner must meet the requirements for SELV (Safety Extra Low Voltage) according to EN 60950.

To maintain compliance with standard CSA C22.2 No. 950/UL 1950 and norm EN 60950, the power source should meet applicable performance requirements for a limited power source.

# INSTALLING THE SCANNER TO THE HOST (STANDARD FEATURES)

Primary/Secondary setup continued from previous page.

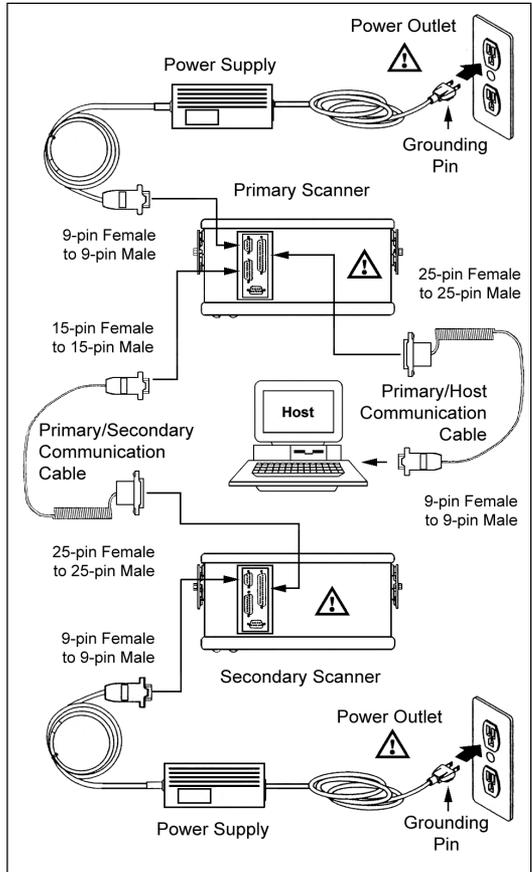

All equipment must be connected before power-up. After both units complete the power-up diagnostics, the operator will need to program the primary unit with the MetroSet Program provided.

**Additional Equipment needed:** Primary/Secondary Cable [MLPN 52-52707]

To avoid potential problems, do not power up the scanner until the communication cable is secured to the host.

1. Turn off the host system.
2. Connect the communications cable to the HoloTrak® primary scanner and to the host.
3. Connect the Primary/Secondary cable to the primary scanner and the secondary scanner.
4. Check the AC input requirements of the power supplies for both scanners to make sure the voltages match the AC outlets.
5. Connect the power supplies to the scanners.
6. Plug the power supplies into the AC outlets to supply power to the both scanners.
7. Power up the host system.

## Caution:

To maintain compliance with applicable standards, all circuits connected to the scanner must meet the requirements for SELV (Safety Extra Low Voltage) according to EN 60950.

To maintain compliance with standard CSA C22.2 No. 950/UL 1950 and norm EN 60950, the power source should meet applicable performance requirements for a limited power source.

# INSTALLING THE SCANNER TO THE HOST (OPTIONAL FEATURES)

## External Speaker Box Option

When attached, beeper tones from the scanner are emitted from both the scanner speaker and external speaker to serve as an audible indication of the operation of the scanner.

There are 6 beeper options available:

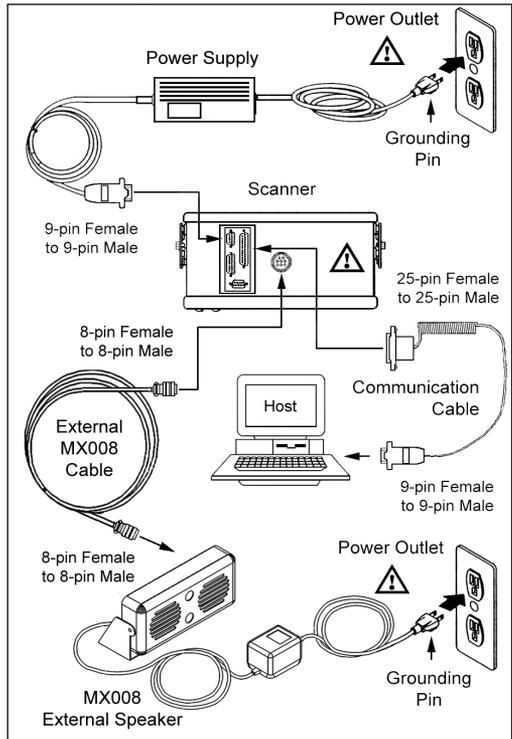

- Normal Tone
- Tone 1
- Tone 2
- Tone 3
- Tone 4
- No Tone

Beeper tones can be adjusted by using the MetroSet<sup>®</sup> program.

To avoid potential problems, do not power up the scanner until the communication cable is secured to the host.

1. Turn off the host system.
2. Connect the communications cable to the HoloTrak<sup>®</sup> and to the host.
3. Connect the External MX008 cable to the HoloTrak and the MX008.
4. Check the AC input requirements of the power supply for the scanner and the MX008 to make sure the voltages match the AC outlets.
5. Connect the power supply to the HoloTrak.
6. Plug the power supplies into the AC outlet.
7. Power up the host system

### Caution:

To maintain compliance with applicable standards, all circuits connected to the scanner must meet the requirements for SELV (Safety Extra Low Voltage) according to EN 60950.

To maintain compliance with standard CSA C22.2 No. 950/UL 1950 and norm EN 60950, the power source should meet applicable performance requirements for a limited power source.

# INSTALLING THE SCANNER TO THE HOST (OPTIONAL FEATURES)

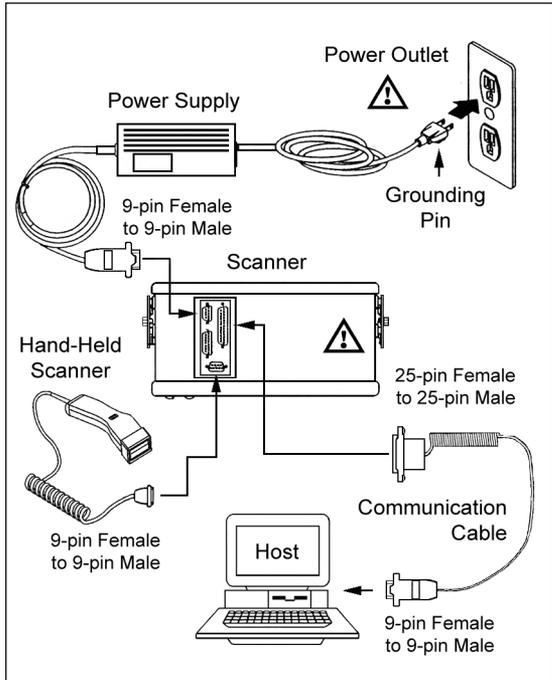

## Hand-held Port Option

A Non-Decode Hand-Held Scanner can be connected to an IS8000 series fixed scanner.

To avoid potential problems, do not power up the scanner until the communication cable is secured to the host.

1. Turn off the host system.
2. Connect the communications cable to the HoloTrak<sup>®</sup> and to the host.
3. Connect the communication cable of the hand-held scanner to the HoloTrak.
4. Check the AC input requirements of the power supply for the scanner to make sure the voltage matches the AC outlet.
5. Connect the power supply to the HoloTrak.
6. Plug the power supply into the AC outlet.
7. Power up the host system.

When the hand-held scanner first receives power, it will immediately go through a self-diagnostic routine, then the green and red LEDs will flash, and the unit will beep once.

### Caution:

To maintain compliance with applicable standards, all circuits connected to the scanner must meet the requirements for SELV (Safety Extra Low Voltage) according to EN 60950.

To maintain compliance with standard CSA C22.2 No. 950/UL 1950 and norm EN 60950, the power source should meet applicable performance requirements for a limited power source.

## CONFIGURATION TO THE HOST SYSTEM

---

The scanner is shipped from the factory configured to a set of default conditions noted in the *Default Settings* section of this guide. In order for the scanner to communicate with the host system, it will need to be properly configured. Since each host system is unique, the scanner must be configured to match the host system requirements. Use the MetroSet<sup>®</sup>2 Scanner Configuration Program provided to configure the scanner.

### Primary/Secondary Configuration Note

During configuration, the secondary scanner's communication protocol will be established automatically through the primary scanner. If the configuration is to be downloaded from the host to the scanners, it is required that both the primary and the secondary scanners are powered up and ready to scan. The appropriate communications cables should be connected between the host and the primary scanner and between the primary and the secondary scanner.

Once a configuration is downloaded to the primary scanner, the primary will automatically configure the HoloTrak secondary scanner. This step is necessary in order to configure the secondary scanner properly. For all practical purposes, the scanners will act as one scanner. Once both units are configured, the scanner settings are stored in non-volatile RAM, and will not need to be configured again.

## INSTALLING AND RUNNING THE METROSET<sup>®</sup> 2 PROGRAM

---

### Installation

1. Close all open applications.
2. Insert the MetroSet<sup>®</sup> 2 CD into your CD drive.
3. The installation wizard will display the *Welcome* dialog box, select **Next** to proceed to with the installation.

If the wizard does not automatically start, go to the windows **Start** menu, choose **Run**, designate the CD-ROM drive, type **setup** (d:\setup) and then click OK.

4. To accept the default installation directory, select **Next**. To change the destination folder, select **Browse** to locate and choose the desired folder.
5. To accept the default program folder, select **Next**. To change the default program folder type a new folder name or choose an existing folder.
6. When the setup process is complete, select **Yes**, and choose **Finish** to restart your computer.

# INSTALLING AND RUNNING THE METROSET® PROGRAM

---

## How to Start

To avoid potential problems, do not power up the scanner until the communication cable is secured to the host.

1. Turn **off** the PC after installing the MetroSet 2 program.
2. Connect the communication cable to the scanner and to the RS-232C serial port (COM1 or COM2) located on the PC.
3. Check the AC input requirements of the transformer to make sure the voltage matches the AC outlet. An easily accessible socket-outlet should be installed near the equipment.
4. Power up the scanner.
5. Turn on the PC.
6. From your Start menu choose **P**rograms, **M**etroSet 2, **M**etroSet 2.
7. Select **H**olotrak® as the unit to configure.
8. Then choose **C**onfigure.
9. For detailed instructions on the configuration options available choose Help from the menu bar.

Metrologic's HoloSet® program can also be used to configure the scanner.

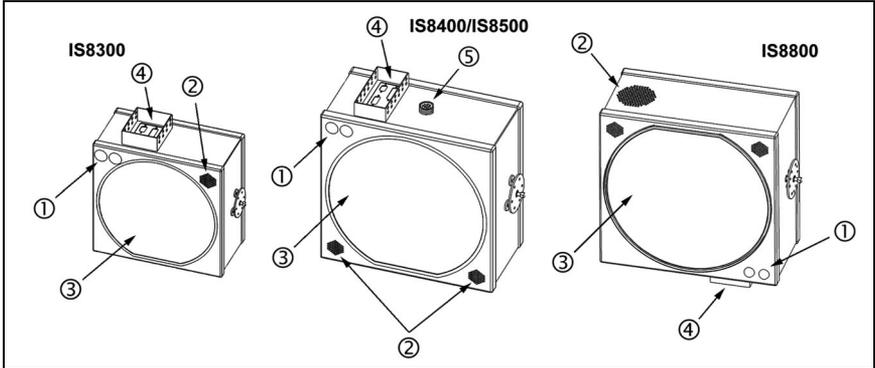

### Caution:

To maintain compliance with applicable standards, all circuits connected to the scanner must meet the requirements for SELV (Safety Extra Low Voltage) according to EN 60950.

To maintain compliance with standard CSA C22.2 No. 950/UL 1950 and norm EN 60950, the power source should meet applicable performance requirements for a limited power source.

## PARTS OF THE SCANNER

### ① Green and Red LEDs

The red LED is on when the unit is done power up, the VLD is emitting light and the unit is ready to scan. The green LED flashes when the scanner has read a bar code successfully. The functions of the LED's can be reversed through special configuration with the MetroSet<sup>®</sup> 2 configuration program. See the *Visual and Audible Indicators* section of this guide for more details.

### ② Speaker

The speaker is configured to emit a beep when a bar code has been transmitted. The IS8800 has an additional 90 dB speaker location on the side of the case.

### ③ Laser Output Window

This aperture emits and receives laser light.

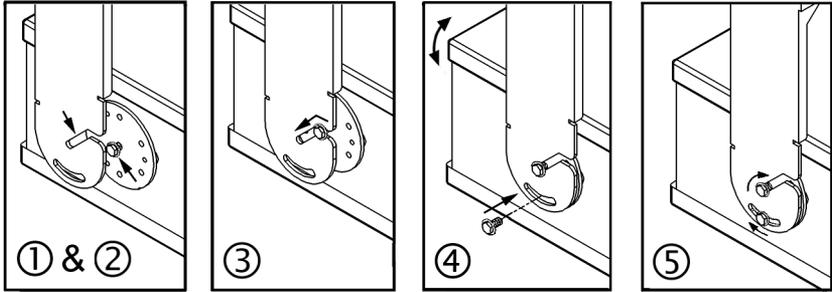

### ④ D-type Connector Area

This area contains four D-type male connectors, a 25-pin, 15-pin, and two 9-pin D-sub connectors. The 25-pin connector is designed to attach a communication cable to the host device. The 15-pin connector is used to attach two scanners as primary/secondary and/or to connect the MX001 industrial control interface to the scanner. The first 9-pin connector is used to attach the power supply to the scanner and the second 9-pin connector is used to attach a hand held 5V non-decode type scanner to the HoloTrak<sup>®</sup>. Refer to *Appendix C* for Pinout details.

### ⑤ D-type Connector Area

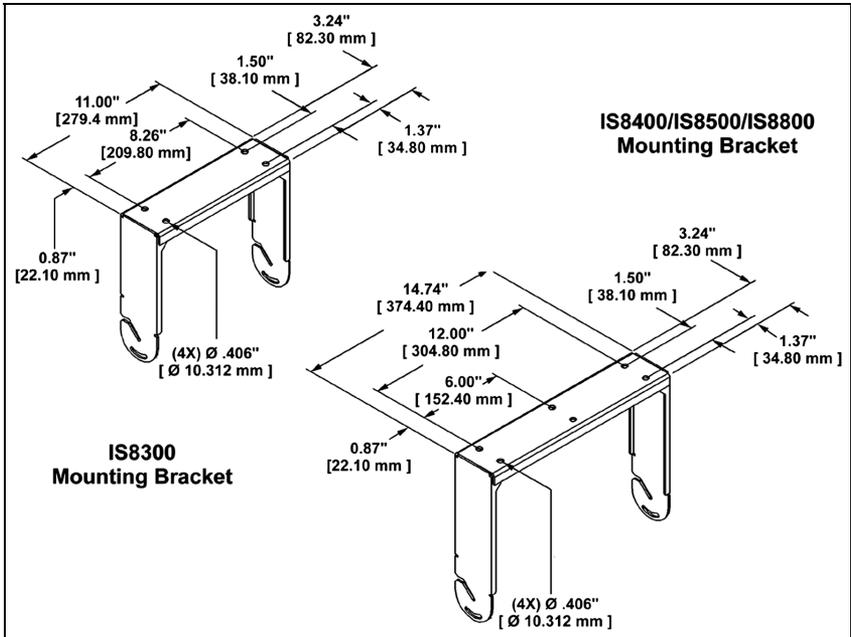

The 8-pin Male AMP Connector is used to attach the optional MX008 external speaker box. Refer to *Appendix C* for Pinout details

## MOUNTING BRACKET INSTALLATION

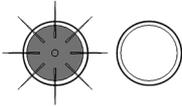

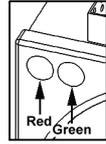

1. Locate the mounting bolts on the sides of the scanner.
2. Align the bolts on the scanner with the channels on the mounting bracket.
3. Slide the unit into place until the scanner bolts sit securely in the bottom of the channels.
4. Rotate the unit to the desired angle and secure into place with a locking bolt in the lower slot.
5. Tighten both bolts to secure the scanner in place.

## Mounting Bracket Hole Pattern

## VISUAL AND AUDIBLE INDICATORS

When the scanner is on, the activity of the red and green LEDs indicate the status of the scanner.

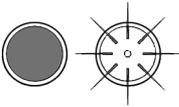

### Flashing Red, No Green

During power-up and diagnostic mode.

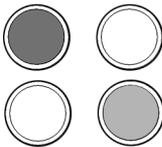

### Steady Red, No Green

Unit has completed power-up, the VLD is emitting light, and the unit is ready to scan.

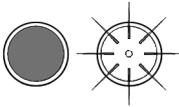

### Steady Red, Green Flash

When the scanner transmits a successful read, the green LED will flash. Generally, if the green LED does not flash, then the bar code has not been successfully read. If handshaking is being used, the green LED goes out when proper handshaking has completed. When the green light turns off, communication to the host is complete.

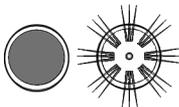

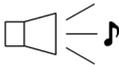

### Alternating Red and Green with razz tone

This indicates a motor failure.

### Steady Red, Green Flashing with a beep

Scanner has entered program mode successfully. (See *Running the MetroSet<sup>®</sup> 2 Program* for more details on configuring the scanner).

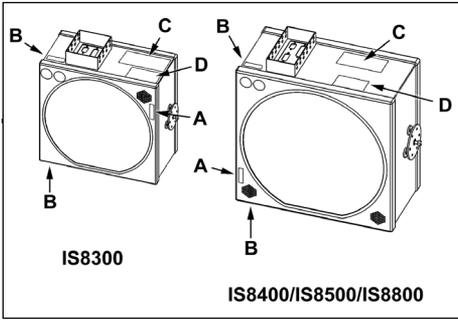

### Steady Red, Green Flashes 3 times with 3 beeps

Scanner has exited program mode successfully.

**Note:** If the scanner has been configured for reverse LED convention, via MetroSet 2, all mode indicators described above also reverse.

# LABELS

**A**

AVOID EXPOSURE  
Laser light is emitted  
from this aperture.

**B**

Danger - Laser light when open  
AVOID DIRECT EXPOSURE TO BEAM

**C**

**HoloTrak®**  
by Metrologic instruments, Inc.  
Blackwood, New Jersey, USA

Contains no user servicable components.  
Warranty void if case is opened.  
Complies with FCC Class A. See manual.

Manufactured Blackwood, NJ.  
June 2000 (D) 12V <sup>DC</sup>

Model: **IS8XXX RS232/RS422**  
Barcode Scanner  
Serial #: 0000000000

 VLD WAVELENGTH = 630 - 690 nm; EN60825-1:1994/A11 : 1996

## CAUTION

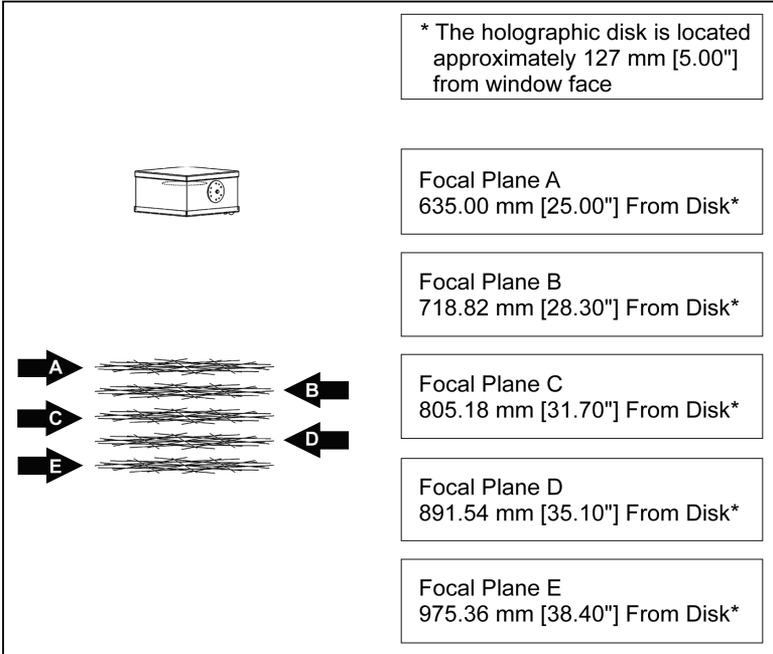

LASER LIGHT  
 DO NOT STARE  
 INTO BEAM  
 7.7 MILLIWATT (PEAK) < 1 mW AVG. POWER  
 VLD WAVELENGTH = 630-690 nm  
 CLASS II LASER PRODUCT

Complies with  
21 CFR Chapter 1  
subchapter J.

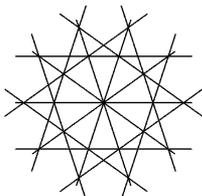

Meets Part 15  
of FCC rules.  
See manual.

# DEPTH OF FIELD AND SCAN PATTERN CHARACTERISTICS

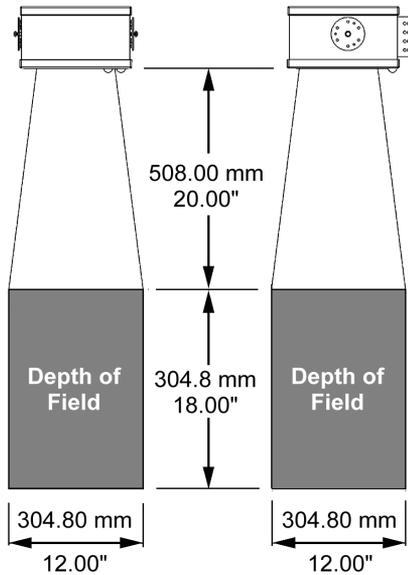

## IS8300 Depth of Field and Scan Pattern

The depth of field area defined is based conservatively on a 0.25 mm/0.010" bar code width. Actual scan areas will vary by label size and application.

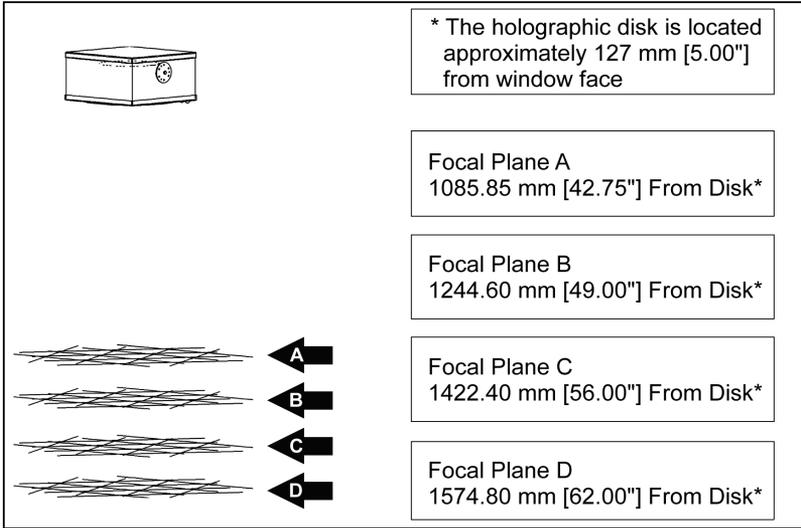

Scan Pattern of a Single Focal Plane

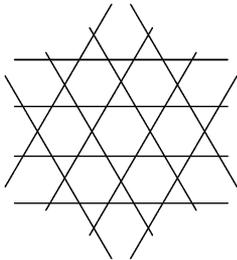

# DEPTH OF FIELD AND SCAN PATTERN CHARACTERISTICS

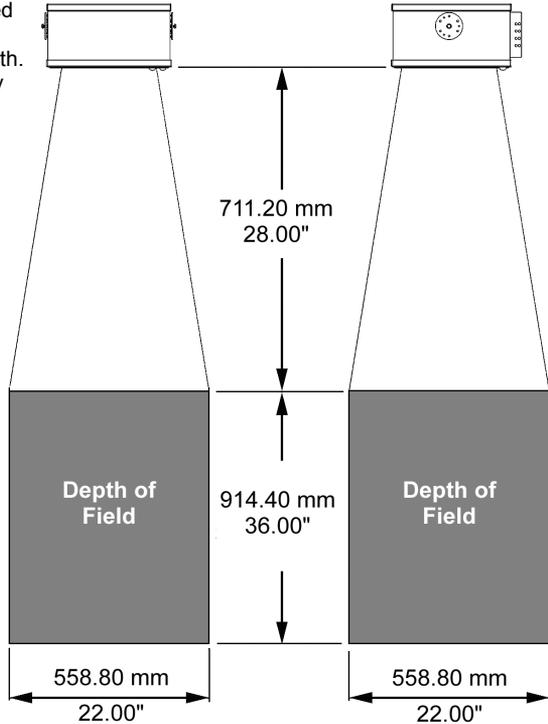

## IS8400 Depth of Field and Scan Pattern

The depth of field area defined is based conservatively on a 0.33 mm/0.013" bar code width. Actual scan areas will vary by label size and application.

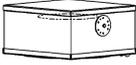

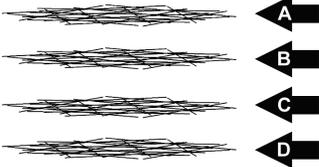

Scan Pattern of a Single Focal Plane

# DEPTH OF FIELD AND SCAN PATTERN CHARACTERISTICS

## IS8500 Depth of Field and Scan Pattern

\* The holographic disk is located approximately 127 mm [5.00"] from window face

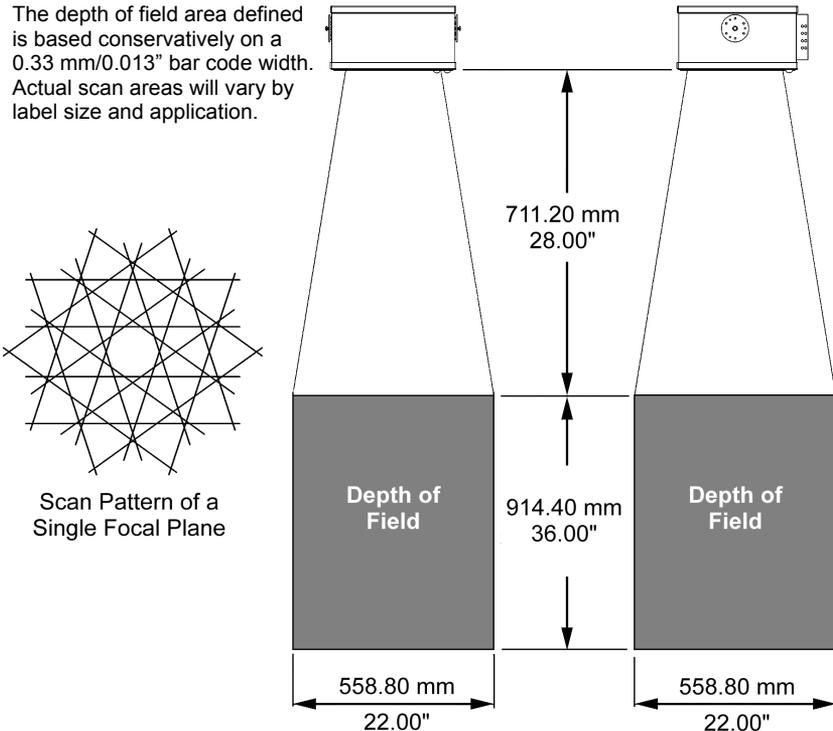

Focal Plane A  
1085.85 mm [42.75"] From Disk\*

Focal Plane B  
1244.60 mm [49.00"] From Disk\*

Focal Plane C  
1422.40 mm [56.00"] From Disk\*

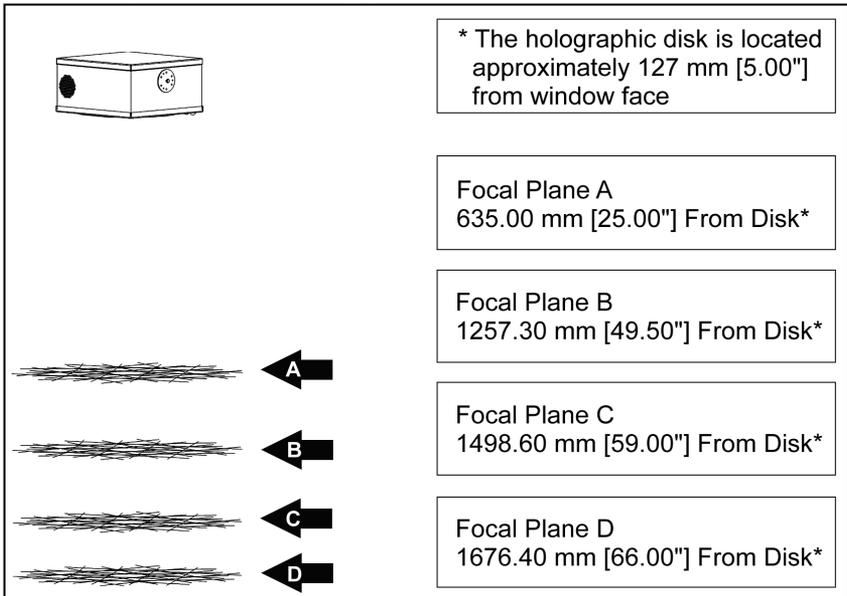

Focal Plane D  
1574.80 mm [62.00"] From Disk\*

The depth of field area defined is based conservatively on a 0.33 mm/0.013" bar code width. Actual scan areas will vary by label size and application.

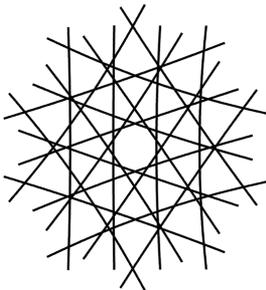

# DEPTH OF FIELD AND SCAN PATTERN CHARACTERISTICS

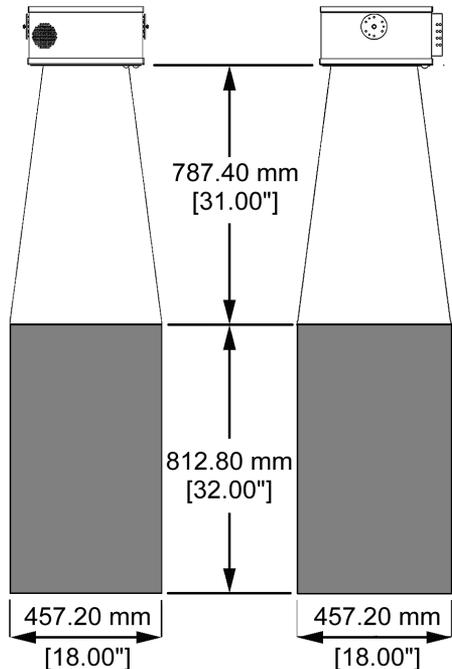

## IS8800 Depth of Field and Scan Pattern

The depth of field area defined is based conservatively on a 0.33 mm/0.013" bar code width. Actual scan areas will vary by label size and application.

Scan Pattern of a Single Focal Plane

## MAINTENANCE

---

Smudges and dirt can interfere with the proper scanning of a bar code. Therefore, the output window will need occasional cleaning.

1. Spray optical quality cleaning fluid onto lint free, nonabrasive cleaning cloth.
2. Gently wipe the output window.

Do not use solvents like alcohol or acetone. These materials can damage the window.

## TROUBLESHOOTING GUIDE

| PROBLEM  | POSSIBLE CAUSE(S)   | ACTION NEEDED  |
|--|---|--|
| No LEDs  | No Power  | Check the power supply and outlet.   |
| No Scan Pattern  | No Power  |  |
| Alternating Red and Green LEDs flash with a razz tone.         | Motor Failure   | Contact a Metrologic service representative.                                   |
| The unit scans but does not communicate with the host.         | The communication cable is not connected to the COM port. | Check the communication cable connection at the host and scanner.              |
|  | The communication cable is damaged.                       | Replace the communication cable.   |
|  | Scanner configuration settings have been lost.            | Reconfigure using MetroSet 2.  |
| The host is receiving data but the data does not look correct. | There is an interface format incompatibility.             | Check that the unit and the host are configured for the same interface format. |
| Unit has shows a reduction in scan performance.                | Scan window dirty   | Clean the unit's window (refer to the maintenance section).                    |

## APPENDIX B

### Default Settings

Many functions of the scanner can be configured, or enabled/disabled. The factory programs the scanner to a set of default parameters. These defaults are marked with an asterisk (\*) in the default column on the following pages. Unmarked parameters show the unavailability for that protocol. To speak with the host system properly, the scanner must be configured to match the systems individual requirements. Not all functions support all communication protocols. If the protocol supports a function, a check mark appears on the chart.

### Limited Warranty

The IS8000 series scanners are manufactured by Metrologic at its Blackwood, New Jersey, U.S.A. facility. The IS8000 series scanners have a three (3) year limited warranty from the date of manufacture. Metrologic warrants and represents that all IS8000 series scanners are free of all defects in material, workmanship and design, and have been produced and labeled in compliance with all applicable U.S. Federal, state and local laws, regulations and ordinances pertaining to their production and labeling.

This warranty is limited to repair, replacement of Product or refund of Product price at the sole discretion of Metrologic. Faulty equipment must be returned to the Metrologic facility in Blackwood, New Jersey, U.S.A. or Puchheim, Germany. To do this, contact Metrologic's Customer Service/Repair Department to obtain a Returned Material Authorization (RMA) number.

In the event that it is determined the equipment failure is covered under this warranty, Metrologic shall, at its sole option, repair the Product or replace the Product with a functionally equivalent unit and return such repaired or replaced Product without charge for service or return freight, whether distributor, dealer/reseller, or retail consumer, or refund an amount equal to the original purchase price.

This limited warranty does not extend to any Product which, in the sole judgement of Metrologic, has been subjected to abuse, misuse, neglect, improper installation, or accident, nor any damage due to use or misuse produced from integration of the Product into any mechanical, electrical or computer system. The warranty is void if the case of Product is opened by anyone other than Metrologic's repair department or authorized repair centers.

THIS LIMITED WARRANTY, EXCEPT AS TO TITLE, IS IN LIEU OF ALL OTHER WARRANTIES OR GUARANTEES, EITHER EXPRESS OR IMPLIED, AND SPECIFICALLY EXCLUDES, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE UNDER THE UNIFORM COMMERCIAL CODE, OR ARISING OUT OF CUSTOM OR CONDUCT. THE RIGHTS AND REMEDIES PROVIDED HEREIN ARE EXCLUSIVE AND IN LIEU OF ANY OTHER RIGHTS OR REMEDIES. IN NO EVENT SHALL METROLOGIC BE LIABLE FOR ANY INDIRECT OR CONSEQUENTIAL DAMAGES, INCIDENTAL DAMAGES, DAMAGES TO PERSON OR PROPERTY, OR EFFECT ON BUSINESS OR PROPERTY, OR OTHER DAMAGES OR EXPENSES DUE DIRECTLY OR INDIRECTLY TO THE PRODUCT, EXCEPT AS STATED IN THIS WARRANTY. IN NO EVENT SHALL ANY LIABILITY OF METROLOGIC EXCEED THE ACTUAL AMOUNT PAID TO METROLOGIC FOR THE PRODUCT. METROLOGIC RESERVES THE RIGHT TO MAKE ANY CHANGES TO THE PRODUCT DESCRIBED HEREIN.

## APPENDIX E

---

### Notices

This equipment has been tested and found to comply with limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense. Any unauthorized changes or modifications to this equipment could void the users authority to operate this device.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

#### Notice

This Class A digital apparatus complies with Canadian ICES-003.

#### Remarque

Cet appareil numérique de la classe A conforme a la norme NMB-003 du Canada.

#### Caution

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous laser light exposure. Under no circumstances should the customer attempt to service the laser scanner. Never attempt to look at the laser beam, even if the scanner appears to be nonfunctional. Never open the scanner in an attempt to look into the device. Doing so could result in hazardous laser light exposure. The use of optical instruments with the laser equipment will increase eye hazard.

#### Atención

La modificación de los procedimientos, o la utilización de controles o ajustes distintos de los especificados aquí, pueden provocar una luz de láser peligrosa. Bajo ninguna circunstancia el usuario deberá realizar el mantenimiento del láser del escáner. Ni intentar mirar al haz del láser incluso cuando este no esté operativo. Tampoco deberá abrir el escáner para examinar el aparato. El hacerlo puede conllevar una exposición peligrosa a la luz de láser. El uso de instrumentos ópticos con el equipo láser puede incrementar el riesgo para la vista.

#### Attention

L'emploi de commandes, réglages ou procédés autres que ceux décrits ici peut entraîner de graves irradiations. Le client ne doit en aucun cas essayer d'entretenir lui-même le scanner ou le laser. Ne regardez jamais directement le rayon laser, même si vous croyez que le scanner est inactif. N'ouvrez jamais le scanner pour regarder dans l'appareil. Ce faisant, vous vous exposez à une rayonnement laser qu'est dangereux. L'emploi d'appareils optiques avec cet équipement laser augmente le risque d'endommagement de la vision.

## APPENDIX E (CONTINUED)

---

### **Achtung**

Die Verwendung anderer als der hier beschriebenen Steuerungen, Einstellungen oder Verfahren kann eine gefährliche Laserstrahlung hervorrufen. Der Kunde sollte unter keinen Umständen versuchen, den Laser-Scanner selbst zu warten. Sehen Sie niemals in den Laserstrahl, selbst wenn Sie glauben, daß der Scanner nicht aktiv ist. Öffnen Sie niemals den Scanner, um in das Gerät hineinzusehen. Wenn Sie dies tun, können Sie sich einer gefährlichen Laserstrahlung aussetzen. Der Einsatz optischer Geräte mit dieser Laserausrüstung erhöht das Risiko einer Sehschädigung.

### **Attenzione**

L'utilizzo di sistemi di controllo, di regolazioni o di procedimenti diversi da quelli descritti nel presente Manuale può provocare delle esposizioni a raggi laser rischiose. Il cliente non deve assolutamente tentare di riparare egli stesso lo scanner laser. Non guardate mai il raggio laser, anche se credete che lo scanner non sia attivo. Non aprite mai lo scanner per guardare dentro l'apparecchio. Facendolo potete esporVi ad una esposizione laser rischiosa. L'uso di apparecchi ottici, equipaggiati con raggi laser, aumenta il rischio di danni alla vista.

### **European Standard**

#### **Warning**

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

### **Funkstöreigenschaften nach EN 55022:1998**

#### **Warnung!**

Dies ist eine Einrichtung der Klasse A. Diese Einrichtung kann im Wohnbereich Funkstörungen verursachen; in diesem fall kann vom Betreiber verlangt werden, angemessene Maßnahmen durchführen.

### **Standard Europeo**

#### **Attenzione**

Questo e' un prodotto di classe A. Se usato in vicinanza di residenze private potrebbe causare interferenze radio che potrebbero richiedere all'utilizzatore opportune misure.

#### **Attention**

Ce produit est de classe "A". Dans un environnement domestique, ce produit peut être la cause d'interférences radio. Dans ce cas l'utiliseteur peut être amené à predre les mesures adéquates

## APPENDIX F
