With this Item Pricing application, you can print preset labels in 26 non-database styles and 17 database styles. To print labels, you enter data manually or download data from a database to the Monarch® PATHFINDER Ultra® printer.

This manual contains instructions for

- ◆ using the keyboard.
- ◆ printing.
- ◆ non-database operation.
- ◆ setting up the printer.
- ◆ creating sequential files for database operation.
- ◆ updating database files.
- ◆ database operation.
- ◆ using templates (see Appendix A).

Using the Keyboard

At the keyboard, you can use the following keys for special purposes:

- ◆ function keys **F1**, **F2**, **F3**, and **F4**.
- ◆ the **shift** key.
- ◆ the **Escape** key.

Using Function Keys

You can use any of four function keys at any **Format #** prompt.

- ◆ **F1** allows you to select from the Main Menu:
 1. **No Database**
 2. **Use Database.**
- ◆ **F2** allows you to select a print method. Press  or  to see the options. For more information on printing options, see “Print Methods.”
- ◆ **F3** allows you to select
 1. **Save Upld Recs**, or
 2. **Do Not Save**when using the database. For more information on these functions, refer to “Database Operating Instructions.”

NOTE: You must select **Save Upld Recs** before scanning data if you plan to upload.

- ◆ **F4** allows you to **Download Data** and/or **Upload Data** when using the database feature. For more information on these functions, see “Updating Database Files.”

Using the Escape Key

Use the **Escape** key to display the previous prompt or exit from the application.

To exit the application, press **Escape** until the display reads

**Exit – Are you
sure? Y/N**

Type **Y** or **N**.

Toggling Between Alpha/Numeric Modes

To switch between alpha and numeric, press **Shift**. Alpha mode is indicated by a blinking cursor.

Printing Options

When you load this application, you select the print option you want. Use the **F2** key to change printing options at any **Format #** prompt. Use  to scroll for the following options:

- ◆ **Print Method 1** - Prints 1 label automatically.
- ◆ **Print Method 2** - Prints label strips with auto-trigger. Enter quantity when prompted after entering format data. **NOTE:** Remember to load in non-peel mode only.
- ◆ **Print Method 3** - Prints with trigger.
- ◆ **Print Method 4** - Prints required number of labels one at a time with trigger. Enter quantity when prompted after entering format data.

Non-Database Operating Instructions

You can scan or key data into the printer to print labels. Following are instructions for

- ◆ operating in non-database mode.
- ◆ selecting non-database formats.

Using Non-Database Formats

You can select **No Database** from the Main Menu when you start the printer, or press **F1** to get to the Main Menu to select **No Database**.

Once you choose a label format, you can scan or key data into the printer.

To print a label:

1. a. Select **No Database** from the Main Menu. Then press  or  to select the format you need.
Press **Enter**.
OR
b. At **Format #** prompt, scan the template of the format you need (see Appendix A for templates).

NOTE: The label size is a 4-digit number in the top right corner of the display of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

2. Scan or key in data at each prompt and then press **Enter**.
3. Squeeze the trigger to print a label if it does not print automatically.

Press **Esc** to return to the previous prompt.

Selecting Non-Database Formats

The following twenty-six non-database label formats are available:

Format 1

- **1515** 1.5"x1.5" label
- **3L** 3 description lines (0 - 14 alphanumeric characters)
- **UPC** 12 numeric characters
- **Was/Now** 2 prices (1 - 6 numeric characters)

Prompt	What You Do
Format 1 - 1515 3L UPC Was/Now	Press Enter .
Data Line 1 *****	Enter up to 14 alphanumeric characters. Press Enter .
Data Line 2 *****	Enter up to 14 alphanumeric characters. Press Enter .
Data Line 3 *****	Enter up to 14 alphanumeric characters. Press Enter .
UPC-A *****	Scan or enter 11 numeric characters (automatic check digit). Press Enter .
Was Price *****	Enter 1 - 6 numeric characters. Press Enter .
Now Price *****	Enter 1 - 6 numeric characters. Press Enter .

Format 2

- **1511** 1.5"x1.1" label
- **1L** 1 description line (0 - 14 alphanumeric characters)
- **UPC** 12 numeric characters
- **Price** 1 price (1 - 6 numeric characters)

Prompt	What You Do
Format 2 - 1511 1L UPC Price	Press Enter .
Data Line 1 *****	Enter up to 14 alphanumeric characters. Press Enter .
UPC-A *****	Scan or enter 11 numeric characters (automatic check digit). Press Enter .
Price *****	Enter 1 - 6 numeric characters. Press Enter .

Format 3

- **1511** 1.5"x1.1" label
- **1L** 1 description line (0 - 14 alphanumeric characters)
- **UPC** 12 numeric characters

Prompt	What You Do
Format 3 - 1511 1L UPC No Price	Press Enter .
Data Line 1 *****	Enter up to 14 alphanumeric characters. Press Enter .
UPC-A *****	Scan or enter 11 numeric characters (automatic check digit). Press Enter .

Format 4

- **1511** 1.5"x1.1" label
- **UPC** 12 numeric characters
- **1L** 1 description line (0 - 14 alphanumeric characters)
- **Dp** Department (0 - 6 numeric characters)
- **Price** 1 price (1 - 6 numeric characters)

Prompt	What You Do
Format 4 - 1511 UPC 1L Dp Price	Press Enter .
UPC-A *****	Scan or enter 11 numeric characters (automatic check digit). Press Enter .
Desc *****	Enter up to 14 alphanumeric characters. Press Enter .
Price *****	Enter 1 - 6 numeric characters. Press Enter .
Dept. *****	Enter 0 - 6 numeric characters Press Enter .

Format 5

- **1511** 1.5"x1.1" label
- **4L** 4 description lines (0 - 14 alphanumeric characters)

Prompt	What You Do
Format 5 - 1511 4 Lines	Press Enter .
Data Line 1 *****	Enter up to 14 alphanumeric characters. Press Enter .
Data Line 2 *****	Enter up to 14 alphanumeric characters. Press Enter .
Data Line 3 *****	Enter up to 14 alphanumeric characters. Press Enter .
Data Line 4 *****	Enter up to 14 alphanumeric characters. Press Enter .

Setting Up for Database Operation

The printer must be set up to use the database. Following are instructions for

- ◆ setting up the printer.
- ◆ creating sequential or flat files.

Setting up the Printer

In database mode, you update the records by downloading data from the PC and uploading data to the PC. Updating requires you to set up the printer for communication with the PC.

To install the printer application files, database file, and DOSPFX transfer utility on a PC:

NOTE: The PC should NOT be running Windows® during this process.

1. Insert the diskette in the A or B drive.
2. On the c: drive, create the directory called **Monarch**:
`md \Monarch`
3. Change to the directory containing the database files:
`cd \Monarch`
4. Type at the DOS prompt:
`copy a:*.*`

NOTE: If you used the B drive, type: `copy b:*.*`

To set up the printer to communicate:

- ◆ the communication parameters must be set.
- ◆ a communications cable must be connected from your PC to your printer.
- ◆ the printer must be in Receive mode.

The following are the correct settings - an asterisk indicates factory-set defaults.

Parameter	Default
Baud Rate:	9600*
Parity:	Odd*
Data Bits:	7*
Stop Bits:	1*
Flow Control:	Xon/Xoff*
Echo BEL:	(does not matter)
ENQ Polling:	<u>enable</u>
Resp.Timeout:	30*

Creating Sequential Database Files

The printer requires a comma-delimited ASCII sequential or flat file to use the database option. Create the sequential file using nine comma-delimited fields.

NOTE: Although formats may not require all of the fields, separate each field with a comma even if the field is blank.

The nine fields include the following:

1. bar code - numeric or alphanumeric (UPC-A, EAN+5, UPC+2, Code 39, and Code 128 can be supported.)
2. item number - numeric only
3. description 1 - alphanumeric (general information field)
4. description 2 - alphanumeric (general information field)
5. price - numeric only (decimal automatically inserted for cents)
6. lot number - numeric only
7. date - numeric only (entered with or without slashes)
8. user 1 - alphanumeric (used for NOW price field)
9. user 2 - alphanumeric (used for VENDOR or DEPT field)

For the maximum size of each field, see the individual formats.

A full record might look like this example:

```
028028111119,11111,DESC1,DESC2,10000,111,11/2/59,USER1,9999
```

Make sure data entered in the sequential file is appropriate for the formats you are using. For example, you cannot print formats using EAN+5 bar codes if the sequential file contains only UPC-A bar codes.

If you use one file for several formats, make sure the data matches the combined requirements for all formats selected. For example, if you want to use Formats 1-4, the sequential file must include all fields required by Format 3 since that format requires the most data. In this case, the data stream

028028111119,,Toothpaste,,239,,45342,
could be used by Formats 1-4.

NOTE: You must save this file to **data.txt** or you cannot download successfully.

For individual formats and their contents, see “Selecting Database Formats.”

Database Operating Instructions

Once data is entered in the sequential file, the printer can print labels using the database. You can update database files by downloading or uploading records. Use **F3** at **Format Menu** to change the saving records option for uploading.

NOTE: You must select **Save Upld Recs** before scanning data if you plan to upload.

Following are instructions for

- ◆ updating the database files.
- ◆ operating in database mode.
- ◆ selecting database formats.

Download Data to Database

In database mode, you can download a new sequential or lookup file without leaving the application. Downloading a new sequential file erases the previous file.

You must install the following files on the PC to download successfully:

- PU2420v0.cfu
- PF2420v0.fmt
- PFXSEND.exe
- PL2420v0.txt
(use as reference)

NOTE: You must be in database mode to download records.

To download data to the database:

1. Press **F4**.
2. a. If you saved records, the printer displays this message:
1. Download
2. Upload
Press **1**.
b. If you did not save records, the printer displays this message:
Download Data?
Y/N>
Press **Y**.
3. The printer displays this message:
CLEAR LOOKUP
FILES? Y/N
Press **Y** to erase the current lookup files and make room for new files.
4. The printer displays the **Waiting** message.
NOTE: Do not press **ENTER** at this point.
5. On the PC, type
cd \Monarch
Press **Enter**. Then type
PFXSEND PU2420v0.cfu /O:data.txt /L

6. Press **Enter** at the PC to begin the download.
7. When the download finishes, the printer displays this message:
DNLD SUCCESS
8. The printer returns to the previously selected format.
The PC returns to the DOS prompt.

Upload Data to Host

In database mode, if you selected **Save Upld Recs (F3)**, you can use the upload feature to record and display how many labels were printed for each item bar code scanned.

NOTE: You must be in database mode to upload records.

To upload data to the PC:

1. Connect the printer to your PC with a communications cable.
2. On the c: drive of the PC, type
cd \Monarch
Press **Enter**. Then type
pfxget
3. Press **Enter** on the PC.
4. On the printer, **Esc** from the format. Press **F4**.
The printer displays this message:
 1. Download Data
 2. Upload Data
Press **2**.
Press **Enter** to prepare to upload. The display reads
 Press ENTER to
 begin upload.
5. Press **ENTER** to upload.
6. When the upload finishes, the printer displays this message:
 SUCCESS ERASE
 FILE? Y/N
The PC displays this message:
 Status: Waiting X Packet(s) Received
7. On the printer, press **Y** or **N** to erase or retain the file.
On the PC, press **Escape**.

8. The printer returns to **Upload Data to Host**.

The PC displays this final message:

Successfully received X packet(s)

Uploading data stores the information to **c:\Ultra.txt**. This file contains the item bar code numbers followed by the quantity of labels printed for each. Contact the System Administrator to print this file.

Using Database Formats

You can select **Use Database** from the Main Menu when you start the printer, or press **F1** to get to the Main Menu to select **Use Database**. You must then decide whether or not to save records.

Saving records allows you to track how many labels were printed by item bar code. Not saving records provides memory for other features.

To use the database, scan or key a bar code at the prompt. The printer searches for the bar code in the database, collects additional information, and prints a label.

To print a label:

1. Select **Use Database** from the Main Menu. Then select
 1. **Save Upld Recs**, or
 2. **Do Not Save**.

NOTE: You must select **Save Upld Recs** before scanning data if you plan to upload. Press **Enter**.

2. a. Press  or  to select the format you need. Press **Enter**.
OR
- b. At **Format #** prompt, scan the template of the format you need (see Appendix A for templates).

NOTE: The label size is a 4-digit number in the top right corner of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

3. Scan or key a bar code for the item.
4. Squeeze the trigger to print a label if it doesn't print automatically. Press **Esc** to return to the previous prompt.

Selecting Database Formats

Use the following structure to create a sequential file for the formats:

Format 1 1511

028028111119,,Toothpaste,,239,,,,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 3 = Description, 0 - 14 alphanumeric characters

Field 5 = Price, 1 - 6 numeric characters

Fields 2, 4, and 6 - 9 = Not Needed

NOTE: The label size is a 4-digit number in the top right corner of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

Format 2

1511

028028222228,,Shampoo,,,,,,,,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 3 = Description, 0 - 14 alphanumeric characters

Fields 2 and 4 - 9 = Not Needed

Format 3

1511

028028333337,,detergent,,629,,,45342,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 3 = Description, 0 - 14 alphanumeric characters

Field 5 = Price, 1 - 6 numeric characters

Field 8 = Department, 0 - 6 numeric characters

Fields 2, 4, 6 - 7, and 9 = Not Needed

NOTE: The label size is a 4-digit number in the top right corner of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

Format 4

1211

028028111119,,,,,,,,,

Field 1 = UPC-A Bar code, 12 numeric characters

Fields 2 - 9 = Not Needed

Format 5

1211

028028222228,,Shampoo,,349,,,,,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 3 = Description, 0 - 14 alphanumeric characters

Field 5 = Price, 1 - 6 numeric characters

Fields 2, 4, and 6 - 9 = Not Needed

NOTE: The label size is a 4-digit number in the top right corner of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

Format 6

1211

028028333337,,,,,629,,,,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 5 = Price, 1 - 6 numeric characters

Fields 2 - 4 and 6 - 9 = Not Needed

Format 7

1211

028028111119,,,,,239,,,,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 5 = Price, 1 - 6 numeric characters

Fields 2 - 4 and 6 - 9 = Not Needed

NOTE: The label size is a 4-digit number in the top right corner of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

Format 8**1211**

028028222228,,Shampoo,Herbal,,,,,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 3 = Description, 0 - 14 alphanumeric characters

Field 4 = Description, 0 - 14 alphanumeric characters

Fields 2 and 5 - 9 = Not Needed

Format 9**2011**

028028333337,75123,detergent,,629,,,,,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 2 = Item Number, 1 - 10 numeric characters

Field 3 = Description, 0 - 14 alphanumeric characters

Field 5 = Price, 1 - 6 numeric characters

Fields 4 and 6 - 9 = Not Needed

NOTE: The label size is a 4-digit number in the top right corner of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

Format 10

2011

978038071834450650 , , , , 899 , , 7/3/96 , 45342 , 599

Field 1 = EAN+5 Bar code, 18 numeric characters

Field 5 = Price, 1 - 6 numeric characters

Field 7 = Date, 0 - 8 numeric characters (with or without slashes)

Field 8 = Department, 0 - 6 numeric characters

Field 9 = NOW Price, 1 - 6 numeric characters

Fields 2 - 4 and 6 = Not Needed

Format 11

2011

978038071834450650 , , , , 899 , , 7/3/96 , 45342 ,

Field 1 = EAN+5 Bar code, 18 numeric characters

Field 5 = Price, 1 - 6 numeric characters

Field 7 = Date, 0 - 8 numeric characters (with or without slashes)

Field 8 = Department, 0 - 6 numeric characters

Fields 2 - 4, 6, and 9 = Not Needed

NOTE: The label size is a 4-digit number in the top right corner of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

Format 12

2011

02802855555555, , , , , 259, , , 7/3/96, 45342, 209

- Field 1 = UPC-A+2 Bar code, 14 numeric characters
- Field 5 = Price, 1 - 6 numeric characters
- Field 7 = Date, 0 - 8 numeric characters (with or without slashes)
- Field 8 = Department, 0 - 6 numeric characters
- Field 9 = NOW Price, 1 - 6 numeric characters
- Fields 2 - 4 and 6 = Not Needed

Format 13

2011

1010101010, 75126, sweater, , , 3999, , , ,

- Field 1 = Code 39 Bar code, 1 - 20 alphanumeric characters
- Field 2 = Item Number, 1 - 10 numeric characters
- Field 3 = Description, 0 - 15 alphanumeric characters
- Field 5 = Price, 1 - 6 numeric characters
- Fields 4 and 6 - 9 = Not Needed

NOTE: The label size is a 4-digit number in the top right corner of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

Format 14

2011

028028222228, , Shampoo, Herbal, 349, , , ,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 3 = Description, 0 - 14 alphanumeric characters

Field 4 = Description, 0 - 14 alphanumeric characters

Field 5 = Price, 1 - 6 numeric characters

Fields 2 and 6 - 9 = Not Needed

Format 15

2040

978038071834450650, , coffee, gourmet, , 6381, 7/3/96, ,

Field 1 = Code 128 Bar code, 1 - 20 alphanumeric characters

Field 3 = Description, 0 - 20 alphanumeric characters

Field 4 = Description, 0 - 20 alphanumeric characters

Field 6 = Lot Number, 1 - 4 numeric characters

Field 7 = Date, 0 - 8 numeric characters (with or without slashes)

Fields 2, 5, and 8 - 9 = Not Needed

Format 16

1208

028028333337 , , , , 629 , , , ,

Field 1 = UPC-A Bar code, 12 numeric characters

Field 5 = Price, 1 - 6 numeric characters

Fields 2 - 4 and 6 - 9 = Not Needed

Format 17

1208

, , , , 2999 , , , ,

Field 5 = Price, 1 - 6 numeric characters

Fields 1 - 4 and 6 - 9 = Not Needed

NOTE: The label size is a 4-digit number in the top right corner of the display. For example, **1511** indicates a 1.5" width x 1.1" feed length label.

Appendix A

Rather than scroll to locate data, you can scan bar codes in these templates to

- ◆ select format numbers,
- ◆ upload,
- ◆ download,
- ◆ change the database/non-database option,
- ◆ select the print method options,
- ◆ exit the application.

You can also key in the single-digit number or letter just below the bar code that corresponds to the selection you want.

NOTE: At any format number prompt, scan the bar code or key the number or letter below the bar code in the template.
