70-31611-01  
Revision C - July 1999

**Quick Reference**

---

# Ready – Préparation – Vorbereiten – Pronto – Preparación

# Scan – Lecture – Scannen – Lettura – Lectura

# Scanning Made Easy

## Ready

Before you use the scanner, make sure all connections are secure.

## Scan - Triggered Mode (LT 1800 only)

- Bring the scanner to the bar code and press the trigger.
- The scan beam, and red LED, illuminate for about one second, or until a successful decode.
- The scan beam must cross every bar and space of the symbol (as in the bar code below).
- When the scanner has read the symbol, you hear a beep, the decode LED turns green.

## Scan - Triggerless Mode

**Note:** LT 1800 requires a Symbol Controller (LL 400/425/500) to use this mode.

- Bring the scanner to the bar code. The scan beam is in a constant blinking state, which becomes steady when the scanner is decoding the bar code.
- The scan beam must cross every bar and space of the symbol (as in the bar code below).
- When you hear a beep, the scanner has read the symbol. The decode LED turns green for a moment; it then turns red and remains red.

**RIGHT**

012345

**WRONG**

012345

# Lectura facile

## Préparation

Avant d'utiliser le lecteur, assurez-vous que toutes les connexions sont correctes.

## Lecture - Mode “avec gâchette” (LT 1800)

- Approchez le lecteur du code à barres et appuyez sur la gâchette.
- Le faisceau de lecture ainsi que le voyant rouge s'allument pendant environ une seconde ou jusqu'à ce que le décodage soit effectué.
- Le faisceau de lecture doit balayer l'ensemble des barres et des espaces qui composent le code (comme indiqué sur la figure ci-dessous, à gauche).
- Dès que le symbole est lu, vous entendez un signal sonore (“bip”) et le voyant de décodage passe au vert.

## Lecture - Mode “sans gâchette”

**Remarque:** pour pouvoir utiliser ce mode avec les terminaux LT 1800, il est nécessaire d'employer un Contrôleur Symbol (LL 400/425/500).

- Approchez le lecteur du code à barres. Le faisceau de lecture se met à clignoter puis passe en mode continu lorsque le lecteur décode le code à barres.
- Le rayon de lecture doit balayer l'ensemble des barres et des espaces qui composent le code (comme indiqué sur la figure ci-dessous, à gauche).
- Dès que vous entendez un signal sonore (“bip”), le symbole est lu. Le voyant de décodage passe au vert, puis se fixe au rouge.

CORRECT

012345

INCORRECT

012345

# Scannen – einfach gemacht

## Vorbereiten

Überprüfen Sie alle Kabelanschlüsse vor Inbetriebnahme des Scanners.

## Scannen – Manuelle Auslösefunktion (LT 1800)

- Führen Sie den Scanner an den Strichcode heran, und drücken Sie den Auslöser.
- Lesestrahl und rote LED Diode leuchten für etwa eine Sekunde oder bis zur erfolgreichen Decodierung auf.
- Um zu decodieren, muß der Lesestrahl über alle Striche und Leerstellen des Symbols (entsprechend der Darstellung des Strichcodes links unten) fahren.
- Sobald der Scanner das Symbol eingelesen hat, hören Sie einen Piepton, und die Decodier-LED schaltet auf grün um.

## Scannen – Automatische Auslösefunktion

**Hinweis:** Die Geräte der Serie LT 1800 setzen für die Benutzung dieses Modus eine Symbol-Systemsteuerung (LL 400/425/500) voraus.

- Führen Sie den Scanner an den Strichcode heran. Der Lesestrahl befindet sich in einem konstant blinkenden Zustand der dauerhaft wird, sobald der Scanner den Strichcode decodiert.
- Um zu decodieren, muß der Lesestrahl über alle Striche und Leerstellen des Symbols (entsprechend der Darstellung des Strichcodes links unten) fahren.
- Sobald Sie einen Piepton hören, hat der Scanner das Symbol eingelesen.  
Die Decodier-LED wird kurzzeitig grün, wechselt dann auf rot und bleibt rot.

**RICHTIG**

012345

**FALSCH**

012345

# Lettura facile

## Pronto

Prima di usare il lettore laser, accertarsi che tutti i collegamenti cavo siano stati eseguiti correttamente.

### **Lettura - Accensione a pulsante (LT 1800)**

- Avvicinare il lettore laser al codice a barre e premere il pulsante.
- Il fascio di lettura ed il LED rosso s'illuminano per circa un secondo o fino a decodificazione avvenuta.
- Il fascio di lettura deve attraversare ogni barra e spazio presente nel codice (come nell'esempio a sinistra in basso).
- Quando il lettore ha decodificato il codice, si ode un bip ed il LED di decodifica diventa verde.

## Lettura - Accensione automatica

**Nota:** Per utilizzare questa modalità, l'LT 1800 richiede un Controller Symbol (LL 400/425/500).

- Avvicinare il lettore laser al codice a barre. Il fascio di lettura lampeggia e diviene fisso quando il lettore sta eseguendo la decodifica del codice a barre.
- Il fascio di lettura deve attraversare ogni barra e spazio presente nel codice (come nell'esempio a sinistra in basso).
- Quando il lettore ha decodificato il codice, si ode un bip. Il LED di decodifica diventa verde per un attimo, poi ritorna rosso e rimane tale.

**CORRETTO**

012345

**INCORRETTO**

012345

# Procedimiento de lectura

## Preparación

Compruebe las conexiones de todos los cables antes de hacer uso del scanner.

## Lectura con activación manual (LT 1800)

- Acerque el scanner al código de barras y pulse el gatillo.
- El scanner proyecta un haz de lectura y, para advertir tal circunstancia, se ilumina el piloto rojo, el cual se apaga transcurrido un segundo o al finalizar el proceso de decodificación.
- Enfoque el haz de lectura de forma que abarque todas las barras y espacios del símbolo, tal y como se ilustra en la figura de la izquierda.
- Cuando el scanner haya leído el símbolo, emite un pitido agudo y el color del indicador luminoso cambia a verde.

## Lectura con activación automática

**Nota:** LT 1800 requiere un controlador Symbol (LL 400/425/500) para utilizar este modo.

- Acerque el scanner al código de barras. El haz de lectura –que en este modo se apaga y se enciende continuamente– deja de parpadear durante el proceso de decodificación.
- Enfoque el haz de lectura de forma que abarque todas las barras y espacios del símbolo, tal y como se ilustra en la figura de la izquierda.
- Cuando el scanner haya leído el símbolo, emite un pitido agudo. El color del indicador luminoso cambia a verde momentáneamente; luego vuelve a rojo y queda tal.

**CORRECTO**

012345

**INCORRECTO**

012345

## **Software Port**

**(only for use with the models listed below)**

- LT 1830-I4XXA
- LT 1830-E4XXE

Scan the bar code corresponding to the port the host is configured for.

**Note:** This does not need to be the port the scanner is connected to.

## **Port logiciel**

**(utilisable uniquement avec les modèles indiqués ci-dessous)**

- LT 1830-I4XXA
- LT 1830-E4XXE

Lisez le code à barres correspondant au port pour lequel l'ordinateur central est configuré.

**Remarque:** cela n'est pas nécessairement le port auquel le lecteur est raccordé.

## **Software-Port**

**(nur in Verbindung mit den nachfolgend aufgeführten Modellen)**

- LT 1830-I4XXA
- LT 1830-E4XXE

Der Scanner muß mit dem Parameter-Strichcode auf den entsprechenden Host-Port eingestellt werden. Scannen Sie hierzu den Strichcode, der zum Port gehört.

**Hinweis:** Dies muß nicht notwendigerweise der Port sein, an dem der Scanner angeschlossen ist.

## **Porta software**

**(da utilizzarsi solo con i modelli sotto elencati)**

- LT 1830-I4XXA
- LT 1830-E4XXE

Eseguire la scansione del codice a barre corrispondente alla porta per la quale è configurato l'host.

**Nota:** Non deve necessariamente essere la porta alla quale è collegato il lettore.

## Puerto de software

(sólo para su uso con los modelos detallados a continuación)

- LT 1830-I4XXA
- LT 1830-E4XXE

Lea el código de barras correspondiente al puerto para el que está configurado la unidad “host”.

**Nota:** no es necesario que sea el puerto al que está conectado el escáner.

**PORT 5B**

**PORT 9B/9E**

**PORT 17**

## **What Does The Beep Mean?**

When you hear 1 beep (short high tone) it means data has been decoded successfully. If any other beeps are heard, contact the technical person in charge of scanning.

## **Maintenance**

A dirty exit window may affect scanning accuracy. Clean the window with a tissue moistened with ammonia/water. Do not spray water or other cleaning liquids directly into the window.

## What If...

**Nothing happens when you follow the operating instructions.**

- Check the system power.
- Check for loose cable connections.
- Be sure the scanning system is programmed to read the type of bar code you are trying to scan.
- Be sure you have brought the scanner to the bar code.
- Check to be sure the symbol is not defaced.

For more information on your scanner, consult the *Product Reference Guide*.

## **Que signifie le “bip” ?**

Lorsque vous entendez un signal sonore (son bref et aigu), les données sont décodées. Si d'autres “bips” sont émis, contactez votre spécialiste.

## **Entretien**

La précision du lecteur dépend de la propreté de la fermeture de sortie.  
Nettoyez-la avec un chiffon imbibé d'eau ammoniacale. Ne vaporisez pas d'eau ou d'autres solutions nettoyantes directement sur la fenêtre.

# **Que faire si ? ...**

**Rien ne se passe alors que vous avez suivi toutes les consignes d'utilisation**

- Vérifiez l'alimentation du système.
- Vérifiez les connexions.
- Assurez-vous que le système de lecture laser est programmé pour lire ce type de code à barres.
- Veillez à amener correctement le lecteur près du code à barres.
- Vérifiez que le code à barres n'est pas endommagé.

Pour de plus amples informations concernant votre lecteur, consultez la brochure.

## **Was bedeutet der Piepton?**

Sobald Sie einen Piepton (einen kurzen, hohen Ton) hören, bedeutet dies, daß die Daten erfolgreich decodiert wurden. Sollten Sie andere Pieptöne hören, wenden Sie sich an den technischen Beauftragten in Ihrem Unternehmen.

## **Wartung**

Die Genauigkeit des Scannens kann durch ein verschmutztes Fenster beeinträchtigt werden. Reinigen Sie das Fenster mit Hilfe eines mit Salmiakgeist getränkten Tuches. Spritzen Sie weder Wasser noch sonstige Reinigungsmittel direkt auf das Fenster!

# **Was tun, falls ...**

**nichts passiert, obwohl Sie die Bedienungsanleitung befolgt haben?**

- Überprüfen Sie die Stromversorgung des Systems.
- Kontrollieren Sie, ob alle Kabelanschlüsse fest sitzen.
- Vergewissern Sie sich, daß das Scanning-System für den Strichcodetyp programmiert ist, den Sie einzulesen versuchen.
- Überlegen Sie, ob Sie den Scanner korrekt an den Strichcode herangeführt haben.
- Prüfen Sie nach, ob das Symbol leserlich ist.

Weitere Informationen zu Ihrem Scanner entnehmen Sie dem Benutzerhandbuch.

## **Significato del bip**

Quando si ode un bip (un'emissione sonora breve e acuta) significa che la lettura dei dati è avvenuta correttamente. Nel caso in cui il lettore emetta altri suoni, contattare il tecnico responsabile.

## **Manutenzione**

Una finestra d'uscita sporca potrebbe compromettere la precisione di lettura.  
Pulire la finestra con un panno inumidito con ammoniaca ed acqua.  
Non nebulizzare acqua o altri detergenti liquidi direttamente sulla finestra.

# Cosa fare se...

## Dopo aver seguito le istruzioni non accade nulla:

- Verificare l'alimentazione del sistema.
- Verificare che non vi siano connessioni allentate.
- Accertarsi che il sistema di lettura sia programmato per il tipo di codice a barre che si sta tentando di leggere.
- Accertarsi di aver avvicinato il lettore laser al codice a barre.
- Verificare che il codice non sia illeggibile.
- Per ulteriori informazioni sul lettore a laser, consultare la Product Reference Guide.

## **Señal acústica**

El scanner emite un pitido corto y agudo para indicar que el código de barras se ha leído correctamente. En caso de cualquier señal acústica distinta de la mencionada, ha de ponerse en contacto del servicio técnico.

## **Cuidados**

La acumulación de polvo y suciedad en la ventana de lectura disminuye la eficacia del scanner. Limpie esta ventana con un paño humedecido en agua con amoníaco. Absténgase de pulverizar agua o líquidos de limpieza directamente sobre la ventana.

# Resolución de anomalías

**Si ejecuta las instrucciones de operación del scanner y no sucede nada:**

- Compruebe las conexiones a la red eléctrica.
  - Compruebe las conexiones de todos los cables.
  - Asegúrese de que el scanner se halla programado para la lectura del tipo de código de barras que intenta decodificar.
  - Acerque la ventana de lectura del scanner al código de barras.
  - Compruebe si el código de barras que intenta leer se encuentra en buen estado.
- Si precisa más información, consulte la guía de referencia del scanner.

## **Service Information**

Before you use the unit, it must be configured to operate in your facility's network and run your applications.

If you have a problem running your unit or using your equipment, contact your facility's Technical or Systems Support. If there is a problem with the equipment, they will contact the Symbol Support Center:

## **Warranty**

Symbol Technologies, Inc. (“Symbol”) manufactures its hardware products in accordance with industry-standard practices. Symbol warrants that for a period of twelve (12) months from date of shipment, products will be free from defects in materials and workmanship.

This warranty is provided to the original owner only and is not transferable to any third party. It shall not apply to any product (i) which has been repaired or altered unless done or approved by Symbol, (ii) which has not been maintained in accordance with any operating or handling instructions supplied by Symbol, (iii) which has been subjected to unusual physical or electrical stress, misuse, abuse, power shortage, negligence or accident or (iv) which has been used other than in accordance with the product operating and handling instructions. Preventive maintenance is the responsibility of customer and is not covered under this warranty.

Wear items and accessories having a Symbol serial number, will carry a 90-day limited warranty. Non-serialized items will carry a 30-day limited warranty.

## **Warranty Coverage and Procedure**

During the warranty period, Symbol will repair or replace defective products returned to Symbol’s manufacturing plant in the US. For warranty service in North America, call the Symbol Support Center at 1-800-653-5350. International customers should contact the local Symbol office or support center. If warranty service is required, Symbol will issue a Return Material Authorization Number. Products must be shipped in the original or comparable packaging, shipping and insurance charges prepaid. Symbol will ship the repaired or replacement product freight and insurance prepaid in North America. Shipments from the US or other locations will be made F.O.B. Symbol’s manufacturing plant.

Symbol will use new or refurbished parts at its discretion and will own all parts removed from repaired products. Customer will pay for the replacement product in case it does not return the replaced product to Symbol within 3 days of receipt of the replacement product. The process for return and customer’s charges will be in accordance with Symbol’s Exchange Policy in effect at the time of the exchange.

Customer accepts full responsibility for its software and data including the appropriate backup thereof.

Repair or replacement of a product during warranty will not extend the original warranty term.

Symbol's Customer Service organization offers an array of service plans, such as on-site, depot, or phone support, that can be implemented to meet customer's special operational requirements and are available at a substantial discount during warranty period.

## **General**

Except for the warranties stated above, Symbol disclaims all warranties, express or implied, on products furnished hereunder, including without limitation implied warranties of merchantability and fitness for a particular purpose. The stated express warranties are in lieu of all obligations or liabilities on part of Symbol for damages, including without limitation, special, indirect, or consequential damages arising out of or in connection with the use or performance of the product.

Seller's liability for damages to buyer or others resulting from the use of any product, shall in no way exceed the purchase price of said product, except in instances of injury to persons or property.

Some states (or jurisdictions) do not allow the exclusion or limitation of incidental or consequential damages, so the proceeding exclusion or limitation may not apply to you.

## **Ergonomic Recommendations**

**Caution:** In order to avoid or minimize the potential risk of ergonomic injury follow the recommendations below. Consult with your local Health & Safety Manager to ensure that you are meeting with your company's safety programs to prevent employee injury.

- Reduce or eliminate repetitive motion
- Maintain a natural position
- Reduce or eliminate excessive force
- Keep objects that are used frequently within easy reach
- Perform tasks at correct heights
- Reduce or eliminate vibration
- Reduce or eliminate direct pressure
- Provide adjustable workstations

- Provide adequate clearance
- Provide a suitable working environment
- Improve work procedures.

## **Regulatory Information**

### **Radio Frequency Interference Requirements**

This device has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the Federal Communications Commissions Rules and Regulation. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with FCC Part 15. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

### **Radio Frequency Interference Requirements - Canada**

This device complies with RSS 210 of Industry & Science Canada. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

---

This Class B digital apparatus complies with Industry Canada Standard ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 d'Industrie Canada.

## CE Marking and European Union Compliance

Products intended for sale within the European Union are marked with the CE Mark which indicates compliance to applicable Directives and European Normes (EN), as follows.

Amendments to these Directives or ENs are included:

### ***Applicable Directives***

- Electromagnetic Compatibility Directive 89/336/EEC
- Low Voltage Directive 73/23/EEC

### ***Applicable Standards***

- EN 55 022 - Limits and Methods of Measurement of Radio Interference Characteristics of Information technology Equipment
- EN 50 082-1:1997 - Electromagnetic Compatibility - Generic Immunity Standard, Part 1: Residential, commercial, Light Industry
- IEC 1000-4-2(1995-01) - Electromagnetic compatibility (EMC) - Part 4:Testing and measurement techniques - Section 2: Electrostatic discharge immunity test.
- IEC 1000-4-3(1995-03) - Electromagnetic compatibility (EMC) - Part 4:Testing and measurement techniques - Section 3: Radiated, radio-frequency, electromagnetic field immunity test.
- IEC 1000-4-4(1995-01) - Electromagnetic compatibility (EMC) - Part 4:Testing and measurement techniques - Section 4: Electrical Fast transient/burst immunity test.
- EN 60 950 + Amd 1 + Amd 2 - Safety of Information Technology Equipment Including Electrical Business Equipment
- EN 60 825-1 (EN 60 825) - Safety of Devices Containing Lasers

## Laser Devices

Symbol products using lasers comply with US 21CFR1040.10, Subchapter J and IEC825/EN 60 825 (or IEC825-1/EN 60 825-1, depending on the date of manufacture). The laser classification is marked on one of the labels on the product.

Class 1 Laser devices are not considered to be hazardous when used for their intended purpose. The following statement is required to comply with US and international regulations:

**Caution:** Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous laser light exposure.

Class 2 laser scanners use a low power, visible light diode. As with any very bright light source, such as the sun, the user should avoid staring directly into the light beam. Momentary exposure to a Class 2 laser is not known to be harmful.

## Scanner Labeling

### Class I

Symbol U.S. Federal (FDA)/IEC825/EN60825 Class 1 laser products use low power visible or IR lasers. Class 1 laser devices are not considered to be hazardous when used for their intended purpose. To comply with U. S. Federal and International regulations, the following statement is required.

**CAUTION:** Use of controls, adjustments, or performance of procedures other than those specified herein may result in hazardous visible or invisible laser light exposure.

This advisory statement also applies to all other FDA/IEC825/EN60825 classes of laser products.
