**INTELLIGENT
INSTRUMENTATION[®]**

855M503 version 1.1

Getting Started

Unpacking

Using the enclosed packing slip, verify that all of the parts that you ordered are included in the box or boxes. If any items are damaged, contact your sales representative. All LANpoint CE units are factory-tested prior to shipping.

Testing the Terminal

Test the terminal prior to installation:

- Use a power adapter that meets the power requirements noted in the *LANpoint CE Installation and Maintenance Manual*.
- Connect the power adapter cable to the power input connector P1 located on the back of the terminal.
- Connect the power adapter to a live electrical outlet.
- Verify the External Power light located to the right of the display illuminates and the terminal displays the LANpoint CE splash screen.
- While the system is booting-up, a status line is drawn across the lower edge of the display from left to right. When it reaches the right-hand edge of the window, the splash screen advances to the Windows CE screen.

LANpoint CE splash screen

Windows CE screen

- This concludes the power-up sequence and the unit is ready to use.

Installation

To install the LANpoint CE terminal, use the *LANpoint CE Installation and Maintenance Manual*. Follow the instructions in the manual for mounting the LANpoint CE terminal, connecting cables, and powering the terminal.

LANpoint CE Manuals

The *LANpoint Installation and Maintenance Manual*, *LANpoint CE Developer's Manual*, and this *LANpoint CE Quick Start Guide* are available as Adobe Acrobat files on the Web site www.lanpoint.com.

Keyboard Navigation using the Built-in Keyboard

Use the following keys and keystroke combinations to navigate the menus, menu items, and dialogs on the LANpoint CE terminal. For keyboard combination keystrokes, such as Ctrl+Tab, press and hold the first key (Ctrl) while you press and release the second key (Tab).

Key or keystroke combination	Action
Ctrl+Esc	Opens the Windows CE Start menu.
Esc	Cancels or closes the menu or dialog that is open without saving any changes. Retains previous settings.
Tab	Moves the cursor from one menu item to other tabbed dialogs and drop-down lists.
Ctrl+Tab	Moves the cursor from folder to folder.
Alt+Tab	Opens the Task manager window.
Alt+underlined letter	Selects and opens or closes a menu item.
Arrow keys: up ↑, down ↓, left ←, right →	Moves the cursor in the direction of the arrow key.
Ctrl+Arrow key	Moves the cursor in a text field to the next word in the direction of the arrow key.
Alt+Arrow key	Opens a drop-down list. Use arrow keys to navigate up and down the list.
Shift+Arrow key	Selects a letter in a text field.
Backspace key ←	Moves the cursor to the left in an entry field. If a value is present in an entry field, pressing this key deletes the existing entry. Moves back one directory level in Explorer.
Enter	Sends changes made in a dialog to the Windows Registry which RegScan flushes to CompactFLASH.
spacebar	Toggles to insert or remove a checkmark ✓ in a checkbox.
Ctrl+c	Copies the selected item to the clip board.
Ctrl+v	Pastes the clip board contents into present cursor location.
Ctrl+x	Cuts and places the selected item in the clip board.

Note: Additional keyboard navigation information for the built-in keyboard is located in the *LANpoint CE Installation and Maintenance Manual*.
