Charging

Dolphin Mobile Charger

Part #: 9500-MC

The Dolphin Mobile Charger is a charging cable that connects the terminal directly to a 12 Volt DC power source, such as a cigarette lighter port inside a vehicle, eliminating the need for a cradle.

The cable powers the terminal and charges its main battery in less than four hours. Intelligent battery technology on-board the terminal ensures proper charging.

The Dolphin Mobile Charger is an ideal low-cost charging solution for in-transit mobile applications.

Mounting

The entire kit includes the Dolphin Mobile Mount and adjustable vehicle mounting bracket.
