

Elite 770

Short range portable EFT terminal

The Elite 770 is a compact, lightweight and portable short-range radio frequency point-of-sale terminal. With debit/credit/EBT and smart card transaction capability, the Elite 770 makes portable payment easy. Coupled with the fact that the transaction is taken to the customer and the customer's card never leaves their possession, using the Elite 770 results in improved customer service, loyalty and security. Multiple terminals can also share one base, thus reducing telecommunications costs.

Elite 770

Short range portable EFT terminal

The Elite 770 allows a business to take the terminal to the customer. The Elite 770 comes complete with a built-in thermal printer, secure PIN pad, smart card reader, magnetic stripe reader, radio frequency base, wireless modem and rechargeable battery pack. All these features are incorporated into a compact light weight design. This portable payment solution is ideal for restaurants, hotels, bars, nightclubs and outside cafes.

A Simple-to-Use Compact and Rugged Terminal

- Lightweight and compact all-in-one design provides for a truly convenient solution for the hospitality marketplace
- Internal antenna reduces terminal size and eases placement
- Wireless communication up to 320 feet (100 m) provides convenient "pay at the table" or point-of-service payment
- Transactions are completed quickly with the receipt printed in front of the customer
- The customer maintains control of their card at all times making the transaction more private and secure
- Ergonomic design includes bi-directional magnetic stripe reader, simple-to-change paper roll and ATM style keypad
- One base can support up to 5 terminals

UNICAPT® Architecture

Ingenico's UNICAPT technology ensures software applications are developed in a secure and modular fashion. Programmers can add or update applications without affecting other resident applications eliminating the need for re-certification. Software applications can also be ported to other Elite products. Unicap supports multiple applications on a terminal such as payment, gift cards and loyalty.

Smart Card Ready

- Future smart card requirements are already built-in
- Can handle up to 4 SAM slots to provide flexibility and investment protection
- Capable of handling multi-application cards

TECHNICAL CHARACTERISTICS

Elite 770

Key Management	DUKPT and MasterSession DES and 3DES
Display	4 x 16 graphic backlit LCD display
Memory	2 Mb
