

e^N-Counter 400

Low cost EFT POS terminal

Ingenico's e^N-Counter 400 is a low-cost EFT POS terminal with superior versatility. It allows merchants to electronically verify and process credit, debit, and EBT transactions quickly and easily. It combines economic pricing, increased reliability, and expandability. And it is designed to solve your payment processing needs thoroughly, competently and conveniently.

World leader in secure financial transaction solutions

e^N-Counter 400

Low cost EFT POS terminal

TECHNICAL CHARACTERISTICS

Ingenico designed the e^N-Counter 400 to resemble other industry standard terminals on the outside—however, that is where the familiarity ends. Inside the e^N-Counter 400 is flash memory. This adds stability and versatility to protect your transaction log and terminal application. The e^N-Counter 400 also features multiple ports. This allows the terminal to grow with your business. Which means you can add PIN pads, printers, and other peripherals. Easily and quickly. Whenever you need them!

Easy to Use, Easy to Maintain

- Familiar keyboard & screen layout—enhances ease of use
- Keyboard layout accepts many preprinted overlays—saves you the cost and time involved in re-printing
- Large, bright 16-character display—so easy to read, it speeds customer service

Low-Cost, High Functionality

- Large memory capacity leaves plenty of space for adding check guarantee, and other applications which can improve customer service and reduce fraud
- Multiple port capacity allows you to add PIN pads, check readers, printers, and other peripherals that can add to your payment options
- Start with credit processing, add check services and debit, and later incorporate smart cards for loyalty and stored value applications

Reduced Maintenance, Increased Investment Protection

- Flash memory technology increases reliability and versatility
- Program and transaction data are protected from power fluctuations and surges
- Applications are downloaded over your telephone, making upgrades easy
- The e^N-Counter 400 can grow and expand with your business allowing you to:
 - process credit transactions
 - add an e^N-Crypt PIN pad for debit and EBT transactions
 - connect an e^N-Check check reader to protect yourself from check fraud
