

Product Specification

Paxar™ Sierra Sport2™ 9460™ Portable Re-ticketing Printer

Standard Features

Printing Method

Thermal Direct

Dimensions

Height 147mm (4.8")
 Width 91mm (3.6")
 Depth 122mm (4.8")
 Weight .66kg (1.48lbs)

Printhead

48mm wide (1.89")
 203 DPI – 8 dots/mm

Operator Interface

- On/Off feed
- Three context sensitive keys

Display

Multi-line graphical LCD with backlit and adjustable contrast

Memory

512k RAM and 2MB Flash

Standard Fonts

42 fonts
 Standard, Reduced, Bold, OCR-like, EFF
 Swiss Bold
 Supports Bitmapped, TrueType and International fonts

RF communications

Operates on any 802.11b WIFI RF network
 Optional 2MB

Bar Code Symbolologies

- EAN 8, 13, +2, +5
- UPC A, E, +2, +5
- Interleaved 2 of 5
- Extended Code 39
- CODABAR
- Code 128 (Subset A, B, C)
- MAXICODE
- PDF417
- POSTNET
- MSI

Optional Accessories

- Single/ Four station charger
- Shoulder/hip strap
- AC Power supply
- MPCL Toolbox Utility

Supply Sizes

Widths 13mm to 51mm (0.5" to 2.0") in continuous mode
 Widths 13mm to 52mm (0.5" to 2.05") in peel mode
 Tag/Receipt paper width 13mm to 51mm (0.5" to 2.0")
 Lengths 9.5mm to 305mm (0.375" to 12.0")

Maximum Print Area

48mm x 305mm (1.89" x 12.0")

Performance

Power

7.4V Lithium Ion battery
 Up to 5,000" per charge
 Battery life cycle, approximately 300 full discharge cycles

Printing Rate

76mm (3.0") per second

Environment

Temperature

Operating
 40 F to 104F (4C to 40 C)

Humidity

5% to 90% non condensing

Take the printer to the merchandise and keep your employees on the selling floor with customers.

Creative Services Labelling Systems Security Solutions Retail Control Systems
 Product Branding Global Data Distribution Inventory Tracking Pricing Systems

Streamline in-store labelling and maximise customer service.

Q: Would you like to cut the time it takes for merchandise pricing and re-ticketing?

Are you looking for a way to enhance customer service?

Do pricing errors cause you lost revenue or problems at checkout?

A: Paxar™ Sierra Sport2™ 9460™
Portable Re-ticketing Printer

Automate time-consuming ticketing.

A mobile bar code printer on the sales floor can optimise your entire point-of-sale.

- Make short work of re-ticketing returns and markdowns.
- Keep your sales staff working on the floor with on-the-spot labelling, enhancing customer service.
- Accurately ticket and track with automated data collection, reducing costly labelling errors.
- Avoid manual key-in errors and increase checkout efficiency.
- Save money on back room printers.

The Sierra Sport2 printer generates crisp bar codes, alphanumerics and graphics wherever you need printed labels and tags. It makes short work of in-store re-ticketing jobs such as markdowns, returns, exchanges and store transfers.

Taking the printer to the product maximises employee productivity and customer satisfaction on the sales floor, reduces errors at checkout and saves capital investment on back room printers.

The Sierra Sport2 printer can be carried with complete comfort by hand, waist or shoulder straps. Versatile power options include rechargeable lithium ion battery, AC adapter, and RF link option for wireless connection.

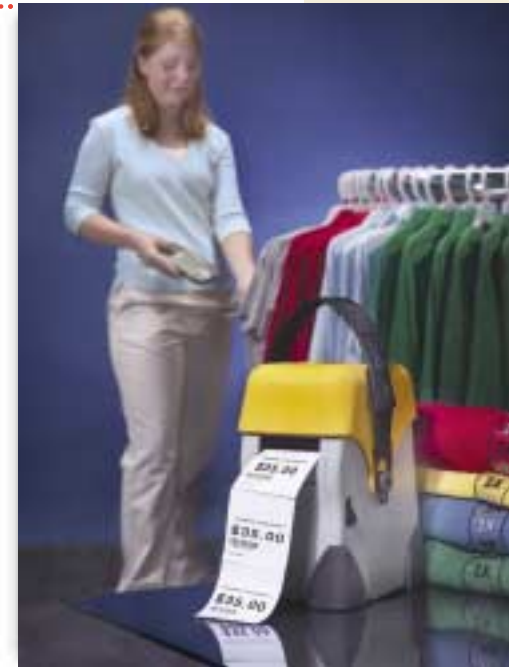

- Lightweight.
- Rugged design that can survive a three foot drop test.
- Easy drop-in supplies loading.
- Plug and play optional RF link allows cable free operation to a wide range of terminals.
- Easy to understand multi line LCD display.
- Produces 5,000" from one single charge.
- Complete portable system integration.
- Can connect to any 802.11b WIFI terminal.
- Improves productivity by eliminating manual tasks.

IP Addressable Option

The majority of large retailers now operate on radio frequency networks using the 802.11 or 802.11b 2.4GHz standards. This enables the retailers to communicate without wires throughout their store to any handheld terminal, epos checkout and shelf edge labelling printer.

An operator can scan a barcode or shelf edge label and ask the host, via the radio network, what the latest price or stock levels are, make alterations and print new labels for that particular product.

Using the IP addressable printer version the host can simply send data back to the printer because it has its own unique IP address. Increasing reliability, robustness and reducing the time it takes for you to carry out your labelling makes your business more efficient and profitable"

Applications

- ✓ In-Store Pricing
- ✓ Re-Ticketing
- ✓ Markdowns
- ✓ Store Transfers
- ✓ Marking Returns
- ✓ Price Verification
- ✓ Shelf Labelling
- ✓ Service Desk Printing
- ✓ Bin Labelling
- ✓ Receiving
- ✓ Asset Management
- ✓ Inventory Management
- ✓ Pick-Pack-Verify Needs
- ✓ WIP Management
- ✓ Cross Docking

Why Paxar?

When you need a mobile printing system for bar code tags and labels, no one offers more solutions than Paxar. All our printers generate accurate, crisp bar codes and alphanumerics and some print graphics. We offer a turnkey system complete with printers, supplies, inks, software, service – and we offer them globally.

Supplies

For smooth and reliable performance, only Paxar supplies are recommended for use with Paxar in-store scanner-printers. Paxar accessories are available worldwide so your labels will be uniform in appearance regardless of where the goods are sold. Paxar labels offer virtually 100% scanability cutting wasted rescanning time and labelling. For added savings, we also offer linerless labels that save on waste, storage and shipping, increasing in-line efficiencies by up to 40%. Customised tags and labels meet specific needs and help build your brand recognition.

Service

Paxar meets your global needs for scanner-printer service. Unlike most manufacturers, Paxar does not outsource its service to third parties with little or no bar code expertise. Every Paxar printing system is fully supported by Paxar's Service Organisation, the largest network of full-time bar code technicians in the industry.

Warranty

In addition to the standard one-year warranty, a variety of service plans are available to meet your needs. Both on-site and return to base services are available.
